

# The Curious Kids Club

## *Cervidology*

Cervidology is a branch of zoology dedicated to the study of deer. Find out about their similarities and differences. Create opportunities to observe them in the wild, study their behaviour, appearance, life cycle and adaptations. Read all about these majestic creatures while finding out about their place in folklore and fairy tales.

Complete ..... tasks from each category to earn this award.

### *Explore Experience Educate*

Learn to identify some different deer species.	Create a watercolour wash and draw on deer silhouettes.	Create a poster showing the life cycle of deer.
Learn about how deer help new growth in forests.	Look for deer tracks in your local area.	Write an account of your woodland adventure.
Select some books about deer to read together.	Visit a zoo or wildlife park to get up close to different species.	Create a leaflet showing tracks and signs of deer to look out for.
Research which species of deer can be found in your area.	Take a woodland walk at dusk to see if you can observe any deer.	Make your own embroidered woodland scene.
Watch the film 'Bambi'	Explore a piece of shed deer antler using a microscope.	Draw a poster showing the difference between male, female and babies.
