

The Curious Kids Club

Limnologist

Are you curious about the inland water based ecosystems around you. Do you want to explore a pond or map a river. Find out about reservoirs, streams, lakes, ponds and rivers, find out about the animals that live their, and the properties of the water that they are made up of.

Complete tasks from each category to earn this award.

Explore Experience Educate

Read a book about the life in a river.	Go Pond dipping to see what creatures live in a pond.	Create a poster about Ancient Egypt.
Map the different ponds and rivers in your local area.	Use a water test kit to measure the properties of a water body.	Create a model/diagram of the course of a river.
Create a list of different types on inland bodies of water.	Measure the current of a river at different parts of its course.	Create an ID guide for animals that live in your local pond
Using a map track a local river from source to mouth.	Raise tadpoles and find out about their life cycle	Write a report on your findings
Categorise water bodies by fresh/sal twater and still/fast flowing	Conduct a survey of the types of fish found where you live.	Create a diagram of the layers of a pond/lake.
