

The Curious Kids Club

Terrarium

Explore the native flora in your local area, find out about how the plants interact and depend on one another. Delve into the fascinating world of mosses and create your own beautiful enclosed native terrarium, record how it grows and changes over time.

Complete tasks from each category to earn this award.

Explore Experience Educate

Research creating closed terrariums.	Take a walk in your local area and try to identify the plants you find.	Create your own plant ID guide.
Find out about different soil mixes and drainage layers.	Measure and graph the leaf size on different plants.	Make a guide on building a terrarium.
Read about the life cycle of plants	Collect and propagate your own moss.	Set a plant info nature trail in your local wild space for others.
Compare the lighting and moisture requirements of plants.	Build your own terrarium in an old jam jar.	Put together terrarium building kits
Design how you would like your terrarium to look.	Document the progress of your terrarium over a few months.	Create a moss poster
